Title: High Performance Liquid Chromatography Column Pressure Excursion

Title: High Performance Liquid Chromatography Column Pressure Excursion

Date of Occurrence: 19-09-2026

Date of Occurrence: 19-09-2026

Source: Quality Control Laboratory

Source: Quality Control Laboratory

Product: Paracetamol Tablet Finished Dose Formulation 650mg

Product: Paracetamol Tablet Finished Dose Formulation 650mg

Batch Number: PCM-2609-88

Batch Number: PCM-2609-88

Batch Size: 500 kg

Batch Size: 500 kg

DETAILED OBSERVATION:

DETAILED OBSERVATION:

During HPLC assay testing for Paracetamol 650mg batch PCM-2609-88, the system backpressure spiked from standard 145 bar to 285 bar at injection sequence #14.

During HPLC assay testing for Paracetamol 650mg batch PCM-2609-88, the system backpressure spiked from standard 145 bar to 285 bar at injection sequence #14.

The automated sequence aborted due to over-pressure cut-off limit (300 bar max).

The automated sequence aborted due to over-pressure cut-off limit (300 bar max).

Chromatographic peak shape for the active ingredient showed peak splitting and tailing.

Chromatographic peak shape for the active ingredient showed peak splitting and tailing.

Analysis could not be concluded within valid system suitability parameters.

Analysis could not be concluded within valid system suitability parameters.

SEVERITY & IMPACT:

SEVERITY & IMPACT:

Severity: Minor

Severity: Minor

Impact Category: Validation / Testing Equipment

Impact Category: Validation / Testing Equipment

Material affected is analytical QC sample only. Bulk batch remains in warehouse quarantine.

Material affected is analytical QC sample only. Bulk batch remains in warehouse quarantine.

CONTAINMENT:

CONTAINMENT:

1. Replaced analytical C18 guard column and inlet frit.

1. Replaced analytical C18 guard column and inlet frit.

2. System flushed with 50:50 Methanol:Water.

2. System flushed with 50:50 Methanol:Water.

3. New testing sequence queued following instrument re-qualification.

3. New testing sequence queued following instrument re-qualification.
